Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The examiner acknowledges the amendment filed February 26, 2007.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-12, 14-22, 24-28, 30, and 32-43 are rejected under 35 U.S.C. 102(e) as being anticipated by Echauz et al. US Patent Number 6,678,548 B1.

See previous office action for details of the rejection. In regards to claims 33-43 the previous office action provides sufficient disclosure to reject the claims; they are rejected on substantiality the same basis.

Response to Arguments

Applicant's arguments filed February 26, 2007 have been fully considered but they are not persuasive.

The added limitation into the independent claims (eg. claim 1), “wherein the computing allows a user to exclude a certain event from being scored” which was previously thought to be allowable it rejected on Echauz et al. The Examiner failed to realize the breath of the claimed limitation. The limitation is rejected by the applied prior art because a filter excludes event from

data analysis, ie. "computing." Echauz et al. states, "FIG. 1 illustrates an exemplary architecture of a seizure prediction and control system 10 in an online operation mode, according to the present invention. A signal acquisition portion 20 conditions (amplifies, filters, isolates, multiplexes, etc.), and digitizes multiple raw signals, preferably intracranial EEG (IEEG)." (emphasis added). The filter in Echauz et al. allows a user to exclude events from being scored.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
